Download Omnissa Horizon Client (Virtual Desktop)

Various software from our computer labs has been made available for students to access from home in a virtual desktop (VDI) environment). We recommend students install and configure the VMware Horizon client on their computer, but there is also a web-based option if needed. Students will also need to set up their multi factor authentication (MFA) to access VDI.

Step	
1	Open your preferred web browser and enter https://remote.massey.ac.nz this will open the Omnissa Horizon web page.
2	On the Omnissa Horizon web page Click **Install Ominssa Horizon Client** 
3	This will open the **Download Omnissa Horizon Client** webpage. Under **Product Downloads** click **Go to Downloads** for your computer operating system e.g. Windows 

4	On the **Download Product** web page click **Download Now** 
5	For **Windows** open your **File Explorer** then click on **Downloads**. Click on **Omnissa-Horizon-Client** you will be asked to agree to the **Privacy Agreement** and **General Terms** before you can install. If you are happy with these click **Agree & Install**. For **Mac** open your **Finder** and click on **Downloads**. **Open DMB** and run **Omnissa Horizon PKG**.  Once it has finished install you will be presented with a pop-up window stating **Success!** and you will need to click **Finish**. It will ask you to restart your computer, you don't have to restart your computer.
6	To access VDI, please refer to Access Virtual Desktops and Multi Factor Authentication.
